Propane Grills

Check the gas tank hose for leaks before using it for the first time each year. Apply a light soap and water solution to the hose. A propane leak will release bubbles. If your grill has a gas leak, by smell or the soapy bubble test, and there is no flame, turn off both the gas tank and the grill. If the leak stops, get the grill serviced by a professional before using it again. If the leak does not stop, call the fire department.

If you smell gas while cooking, immediately get away from the grill and call the fire department. Do not move the grill. If the flame goes out, turn the grill and gas off and wait at least **5 minutes** before re-lighting it.

LAWN CLIPPINGS

Grass and leaves do not belong in the street. Run-off that occurs after rain sends loose grass and leaves into drains, hindering flow and leading to overflow problems.

If you mow your lawn, please bag clipped grass and put beside your can to be collected on your scheduled pick up day. If a contractor mows your lawn, have them take clippings it away. In addition, when a contractor performs construction work at your home, they should remove all used materials etc., and haul away as well. This is a message from your Sanitation Department.
